

PHILEAS CONDEMINE

In short

2025–Present Principal Data Scientist P&C @ SCOR: Developing P&C use cases for AI Assistant, a GenAI-powered document extraction product; mentoring six P&C data scientists and collaborating with the product's 20 contributors, as well as the technical and business teams building and using tools powered by AI Assistant.

2021-2025 Lead ML-Engineer NLP @ COVEA : Delivering Hybrid AI and Gen-AI Efficient and Frugal Solutions in Production with Azure, OpenAI & Databricks.

2018-2021 Senior Data Scientist @ Ministère de la Santé : Modelling Health Sequences with Transformers. Help Data-driven decision-making during CoViD-19 crisis.

2014-2017 Actuarial Data Scientist @ AXA Global P&C : pricing and claims handling with machine learning and external data.

EXPERIENCE

2025–
Present

Principal Data Scientist P&C

SCOR

Paris, France

Developing P&C use cases for [Alssistant](#), a document extraction product with around 20 contributors.

- Provide technical leadership for six P&C data scientists through mentoring, merge request reviews, shared development practices and code reuse.
- Collaborate with contributors across the product on shared features, including the migration from GPT-4.1 to GPT-5.4 and evaluation and observability tools. Work with the technical and business teams building and using applications powered by Alssistant.
- Build an automated feedback loop: collect business users' validations, evaluate extraction quality, improve prompts and post-processing, and validate changes.
- Improve the reliability of LLM outputs through structured outputs validated with Pydantic; develop trace analysis and performance monitoring to support debugging.

2021–
2025

Lead ML-Engineer NLP

COVEA - AI Delivery

Paris, France

- VOX.IA : Client Verbatim Analysis. [AI Award-Winning Project](#).
- NetMessages : Offer real-time selfcare offer to the client with Frugal AI.
- JudiCible : Accelerate Claim Management with AI & Gen-AI Hybrid approach.
- AI in Production : Annotation, Finetuning, Deployment, Drift-Monitoring.
- Publication on [Medium COV&IA](#).

2018–
2021

Senior Data Scientist & (EIG)

Ministry of Health

Paris, France

- Modelling Health Sequences to predict diseases outcome and detect disruption.
- Classification with [active-learning](#) & [General Public WebApp](#) to find Health-focused statistics.
- Tools for regional health agencies : [Interactive Decision Making Tool](#) to help experts elaborate Zoning for health professionals.
- Tech Lead at CoViD-19 crisis center : Develop webapps to gather critical information from [hospitals](#) and [labs](#).
- Workflow to build CoViD-19 Indicators with SIDep, SIVic, VacSI.
- Produce *open-data* with anonymisation : k-anonymity & hierarchical I-diversity.

SKILLS

Python & R Expert

Gen-AI : Summary, Auto-Label, Auto-Define, Key Info Extraction.

Deep-learning with Pytorch & Transformers : Classification.

Machine-learning with GLM, XGBoost/GBM, SVM : pricing, claims handling, fraud, churn.

Big Data with Spark

Dataviz with Python (Streamlit) & R (Shiny)

- 2014-2017 • **Actuarial Data Scientist**
 AXA Global P&C
 Paris, France
 • **P&C pricing innovation** with gradient boosting and ML-interpretation / XAI techniques.
 • Build and deploy Claim Cost Analyzer : ML workflow to score car repairers cost-efficiency.
 • NLP on **bodily injury cases** to assess contentious risk.
 • **Roads own-risk assesement** based on GPS Telematics data.
- 2014 • **Actuarial Thesis**
 AXA Belgium
 Remote
Elderly drivers own-risk assessment - SCOR prize finalist.
- 2013 • **Structuration Intern**
 Exane BNP Paribas (6 months)
 Paris, France
 Building a synthetic index as a dynamic basket of stocks & bonds.
- 2012 • **CAT-Bonds Pricing Intern**
 SCOR (6 months)
 Paris, France
 Pricing CAT-Bonds using Monte-Carlo Markov Chains MCMC.

TRAINING

- 2023-2024 • **Generative AI**
 LLM, RAG, Finetuning, Prompt-engineering.  deeplearning.ai
- 2017-2020 • **Deep learning**
 Advanced training & hands-on projects.  fast.ai, [datascientest](https://datascientest.com), deeplearning.ai
- 2019 • **Spark & Scala**
 Scala Programming + Spark applications.
 Coursera by Martin Odersky & Heather Miller
- 2016 • **Web Development**
 Introduction to HTML, CSS, Javascript & JQuery.  CodeSchool.com
- 2014 • **Introduction to data science**
 Main techniques of supervised & unsupervised learning : SVM, Gradient-Boosting, Random Forests, k-means etc.
 Coursera by Bill Howe
- 2010-2014 • **ENSAE Paris - IP Paris**
  MSc Actuarial Science & Data Science
 Paris, France

TEACHING

2023-
2025

Gen-AI Masterclass (COVEA)

Gen-AI theory and practice. Applications with Copilot. Scaling with Azure OpenAI. Prompt-engineering.

📍 COVEA

2014-
2020

Data Science Teacher

Data-Science for Actuaries &

Data Science Certification

📍 Paris, France

- [Natural Language Processing](#) & Text-mining techniques.
- [Machine Learning](#) for structured data : Gradient Boosting & Support Vector Machine.
- Data Science Hands-On with R, data.table, xgboost, glmnet & liblinear...
- Build Interactive Apps with R + Shiny.
- Data Science for Actuaries (DS4A): 5-days training with hands-on & 1-day hackathon to teach AXA actuaries Data-Science Techniques that can help them better solve Insurance-related problems. The Theoretical Training was given by [Arthur Charpentier](#).

OTHER PROJECTS

I love to hack new data and therefore participated in many Hackathons & Kaggle competitions.

[Kaggle](#) : AXA "Telematics", Otto "Product Classification", Quora "Deduplication", West Nile Virus "Mosquito detection".

Hackathon Gen-AI @ COVEA "SAS to Python with LLMs" (oct. 2024).

Hackathon @ ACPR
[TechSprint Gen-AI](#) (feb 2024).

Hackathon Model Winner @ COVEA "Churn Prediction and Mitigation" (2023).

Hackathon @ AXA "Chatbot for fast-quote with API.AI".

Hackathon @ [APHP](#) "Night-time-Treatment Outliers Detection in Intensive Care".

Hackathon @ ARS-IdF "Environmental Factors of ER admissions".

[Space Invaders Map](#)

Programming a 4-wheel autonomous mini-car with Arduino.

Contribution to Open Project [Buloterie](#).

This resume was built with R [pagedown](#).

Last update 2026-09-26.
