

PHILEAS CONDEMINE

In short

2021-Now Lead ML-Engineer NLP @ COVEA : Delivering Hybrid AI and Gen-AI Efficient and Frugal Solutions in Production with Azure, OpenAI & Databricks.

2018-2021 Senior Data Scientist @ Ministère de la Santé : Modelling Health Sequences with Transformers. Help Data-driven decision-making during CoViD-19 crisis.

2014-2017 Actuarial Data Scientist @ AXA Global P&C : pricing and claims handling with machine learning and external data.

EXPERIENCE

- 2021-Now
- Lead ML-Engineer NLP**
 COVEA - AI Delivery
Paris, France
 - VOX.IA : Client Verbatim Analysis. [AI Award-Winning Project](#).
 - NetMessages : Offer real-time selfcare offer to the client with Frugal AI.
 - JudiCible : Accelerate Claim Management with AI & Gen-AI Hybrid approach.
 - AI in Production : Annotation, Finetuning, Deployment, Drift-Monitoring.
 - Publication on [Medium COV&IA](#).
- 2018-2021
- Senior Data Scientist & (EIG)**
 Ministry of Health
Paris, France
 - Modelling Health Sequences to predict diseases outcome and detect disruption.
 - Classification with [active-learning](#) & [General Public WebApp](#) to find Health-focused statistics.
 - Tools for regional health agencies : [Interactive Decision Making Tool](#) to help experts elaborate Zoning for health professionals.
 - Tech Lead at CoViD-19 crisis center : Develop webapps to gather critical information from [hospitals](#) and [labs](#).
 - Workflow to build CoViD-19 Indicators with SIDep, SIVic, VacSI.
 - Produce *open-data* with anonymisation : k-anonymity & hierarchical I-diversity.
- 2014-2017
- Actuarial Data Scientist**
 AXA Global P&C
Paris, France
 - [P&C pricing innovation](#) with gradient boosting and ML-interpretation / XAI techniques.
 - Build and deploy Claim Cost Analyzer : ML workflow to score car repairers cost-efficiency.
 - NLP on [bodily injury cases](#) to assess contentious risk.
 - [Roads own-risk assesement](#) based on GPS Telematics data.
- 2014
- Actuarial Thesis**
 AXA Belgium
Remote
 - [Elderly drivers own-risk assesement](#) - SCOR prize finalist.
- 2013
- Structuration Intern**
 Exane BNP Paribas (6 months)
Paris, France
 - Building a synthetic index as a dynamic basket of stocks & bonds.

SKILLS

Python & R Expert

Gen-AI : Summary, Auto-Label, Auto-Define, Key Info Extraction.

Deep-learning with Pytorch & Transformers : Classification.

Machine-learning with GLM, XGBoost/GBM, SVM : pricing, claims handling, fraud, churn.

Big Data with Spark

Dataviz with Python (Streamlit) & R (Shiny)

2012 ● **CAT-Bonds Pricing Intern**
 SCOR (6 months)
 Pricing CAT-Bonds using Monte-Carlo Markov Chains MCMC.
 Paris, France

TRAINING

2023-2024 ● **Generative AI**
 LLM, RAG, Finetuning, Prompt-engineering.  [deeplearning.ai](#)

2017-2020 ● **Deep learning**
 Advanced training & hands-on projects.  [fast.ai](#), [datascientest](#), [deeplearning.ai](#)

2019 ● **Spark & Scala**
 Scala Programming + Spark applications.
 Coursera by Martin Odersky & Heather Miller

2016 ● **Web Development**
 Introduction to HTML, CSS, Javascript & JQuery.  CodeSchool.com

2014 ● **Introduction to data science**
 Main techniques of supervised & unsupervised learning : SVM, Gradient-Boosting, Random Forests, k-means etc.
 Coursera by Bill Howe

2010-2014 ● **ENSAE Paris - IP Paris**
  MSc Actuarial Science & Data Science
 Paris, France

TEACHING

2023-2025 ● **Gen-AI Masterclass (COVEA)**
 Gen-AI theory and practice. Applications with Copilot. Scaling with Azure OpenAI. Prompt-engineering.
 COVEA

2014-2020 ● **Data Science Teacher**
 Data-Science for Actuaries &  Data Science Certification
 Paris, France

- [Natural Language Processing](#) & Text-mining techniques.
- [Machine Learning](#) for structured data : Gradient Boosting & Support Vector Machine.
- Data Science Hands-On with R, data.table, xgboost, glmnet & liblinear...
- Build Interactive Apps with R + Shiny.
- Data Science for Actuaries (DS4A): 5-days training with hands-on & 1-day hackathon to teach AXA actuaries Data-Science Techniques that can help them better solve Insurance-related problems. The Theoretical Training was given by [Arthur Charpentier](#).

OTHER PROJECTS

I love to hack new data and therefore participated in many Hackathons & Kaggle competitions.

[Kaggle](#) : AXA "Telematics", Otto "Product Classification", Quora "Deduplication", West Nile Virus "Mosquito detection".

Hackathon Gen-AI @ COVEA "SAS to Python with LLMs" (oct. 2024).

Hackathon @ ACPR [TechSprint Gen-AI](#) (feb 2024).

Hackathon Model Winner @ COVEA "Churn Prediction and Mitigation" (2023).

Hackathon @ AXA "Chatbot for fast-quote with API.AI".

Hackathon @ [APHP](#) "Night-time-Treatment Outliers Detection in Intensive Care".

Hackathon @ ARS-IdF "Environmental Factors of ER admissions".

[Space Invaders Map](#)

Programming a 4-wheel autonomous mini-car with Arduino.

Contribution to Open Project [Buloterie](#).

This resume was built with [R pagedown](#).

Last update 2026-04-23.
